

South Norfolk Council Local Development Framework

Annual Monitoring Report 2007/08

Section 3.2 Housing : Joint Norwich Policy Area Housing Trajectory 2001/02 to 2023/24

Erratum

Following a recent planning appeal inquiry it has been concluded that some sites included in the joint five-year supply calculations for the Norwich Policy Area in South Norfolk's published 2007/08 AMR cannot, on current evidence, be judged likely to make a realistic contribution to that supply. Consequently, the most robust and reliable figures on five-year supply are set out below, which demonstrate a 4.41-year supply over the period 2008/09 to 2012/13 or 4.44-years over the Core Output Indicator H2(c) period 2009/10 to 2013/14.

Please note these figures do not include any assumptions or projections for new allocations to be identified through the LDF process in Broadland, Norwich or South Norfolk.
