

APPENDIX 3

Car Parking Standards

South Norfolk Council have adopted car parking standards for people with mobility difficulties:

1. South Norfolk Council will normally seek to ensure that a minimum of 5% disabled spaces are provided in all car parks within the district, except where local conditions indicate a variation in this percentage.
2. These disabled spaces will normally be located adjacent to the main pedestrian exits from the car park and hard surfaced disabled access routes will be provided where possible.
3. Disabled spaces will be provided in line with the relevant government guidelines on layout, signing and surfacing.
4. The Council will seek to ensure that its own existing car parks meet these guidelines.

General adopted car parking standards for all types of development can be found in 'Standards for Parking in Norfolk' (February 1998). This document is published by and available from Norfolk County Council.
